

Technical Data Sheet

AL-TDS-T800-03-2019

Product	ALINA LIFE™ functional organoclay
Product name	T800
Description	ALINA LIFE™ is a novel multifunctional filler material, environment-friendly and easy-to-use montmorillonite mineral, that prolongs the life and improves the striking appearance of natural oil finishing products.
Applications	ALINA LIFE™ is well-suited for use in natural oil paints, stains and lacquers.
Key Benefits	<ul style="list-style-type: none">• Multifunctional properties improves paint & coating product weathering performance.• Non-allergenic, non-toxic and non-carcinogenic. Environment and human health friendly. Cradle to Cradle Certified™ - Silver level Material Health Certificate.• In limited dosage, does not harm the matrix physico-chemical properties of the system.• Readily applicable for wet grinding and mixing with binders as well as pigments.• Disperses well in natural oil solvents.
Properties	<p>ALINA LIFE™ functional organoclay is naturally-occurring mineral surface-treated with quaternary ammonium compound:</p> <ul style="list-style-type: none">• Surface treated montmorillonite - microencapsulated organics.• Leaching resistant microstructure, VOC and AOX free.• Both hydrophilic and hydrophobic properties.• Slurry form, contains 80% natural oil.• <53 µm (D100) slurry. Applicable for grinding until 1 µm.• Alkali-, acidic- and UV-stable material.• 1,10-1,20 g/cm³ bulk density.• White color.
Ease of Use	<p>Used as an additive to paint material at a dosage of 5%-15%. Recommended dosage calculated for the paint volume.</p> <p>When used in various formulations, amenable for wet grinding down to 1 µm particle size. Can be added directly as a slurry, to simplify dispersion, recommended gradual dispersion into the volume.</p>
Composition	Natural oil suspension of dry organofilized smectite (2:1) with quaternized ammonium salts. Montmorillonite mineral - material base/ vehicle: chlorite, illite, carbonates, silica and hematite.
Thermal Resistance	Heating up to 160°C does not adversely affect physical and functional characteristics of ALINA LIFE™.

Material lifetime protection.

Safety & Regulatory	Classified as non-hazardous under EC 1272/2008. Refer to Safety Data Sheet. Complies with European Reach Regulation EC/1907/2006.
Packaging	10 L plastic package.
Storage, Handling, and Disposal	Store in a dry place. Please refer to the SDS for safety and disposal advice.
Certification	<ul style="list-style-type: none">ALINA SIA has had their ALINA LIFE™ assessed against the criteria of the Material Health category in the Cradle to Cradle Certified™ Product Standard and was awarded a Silver level Material Health Certificate by the Cradle to Cradle Products Innovation Institute. For more information please visit Institute Material Health Certificate registry.ALINA LIFE™ is a raw material used for Paint manufacturing that is compliant with the requirements for Blue Angel Eco-Label - Low-Emission Interior Wall Paints Annex 1 criteria. For compliance documents, please contact ALINA team.
